

Dear Sirs: I am writing regarding the issue of allowing low power FM stations to have priority over translators. I am a listener of K-Love radio which broadcasts in many areas using translators. K-Love radio is an extremely valuable asset to my community in bringing a positive message and in providing information regarding non-profit events in my local community. To lose this service would be doing a great disservice to my listening area. While there are other christian radio stations in my area, there is no other station that provides similar programming. I believe the quality of radio programming would be greatly diminished if K-Love transmissions were over-ridden by other Low Power FM signals.
